

Theresa Louw – Manager at Wynland Analytical Laboratory

Being mainly involved in the wine industry, olive oil was not part of my vocabulary. During 2008 we started testing olive oil and flowing from that, also tasting it. After attending courses presented by Dr Antonio Lauro (2016) and Sue Langstaff (2017) I joined the SA Olive tasting panel, first as guest and thereafter I was included on the panel. During 2018 I joined some of the panel members who visited Turkey to experience their olive industry and attended tasting sessions with their regional panels in Mugla and Aydin.
