

Pablo Canamasas

Pablo Canamasas is an agricultural engineer with over 25 years' experience in the olive industry. Pablo lives in Argentina and provides consultancy services to private companies and olive associations across the world, i.e. USA, Japan, Argentina, Australia, Chile, Brazil, Israel, China, Mexico and New Zealand.

After graduating in Argentina, specialising in olive oil production and oil quality, Pablo attained a post-graduate degree in oil production and table olives in Jaen, Spain. Throughout his career, Pablo has maintained close ties with Spanish and Italian researches. He has accumulated valuable experience working with some of the best-known brands in the world, including Boundary Bend and California Olive Ranch. His depth of knowledge has been recognised by the Australian government who funded his research into extraction and processing techniques. Pablo has published numerous research papers on olive processing and has lectured in various countries including Japan, Italy, Australia and New Zealand.

Pablo has vast experience in modern olive oil extraction techniques, olive processing, oil blending and quality control. Design and development of olive oil processing facilities and continual improvement of industrial efficiencies are some of his areas of interest.

Pablo is respected worldwide and is a regular key speaker on olive oil at processing courses, conferences and seminars around the world. He has been invited to judge at international competitions including the Australian National Olive Competition, Melbourne's Royal Agricultural Society of Victoria Olive show, Royal Adelaide Olive Awards and the Fino Oliva Show in Brazil.

This will be the third South African visit for Pablo who was last here in 2022. He is looking forward to interacting with our members and friends.
